EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Terrence Brown on 2/14/05.

The application has been amended as follows:

In the specification, line 17, "than plastic" has been changed to --as the plastic material--.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or fairly suggest using nitrile butadiene rubber as the material which is etched by the laser to form the master used to form the silicone rollers. While Goto et al. discloses using cutting patterns in nitrile butadiene rubber, the declaration filed 2/14/05 shows substantial unexpected results since it shows that using nitrile butadiene rubber as the surface of the master results in a surface which can be used to make nine times as many silicone rollers as the closest prior art. These unexpected results have therefore overcome the rejection set forth in the office action dated 9/9/04.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
